

SOFTWARE ENGINEER | IT CONSULTANT | SYSTEMS ENGINEER

Versatile Software Engineer and IT Consultant with expertise in designing technology solutions that align technical innovation with business objectives. Brings a balanced background in software development, systems engineering, and IT consulting, combining strong analytical thinking with a solution-oriented approach to complex challenges. Skilled at collaborating with cross-functional teams, optimizing technology environments, and driving continuous improvement through scalable, secure, and user-focused solutions. Passionate about leveraging emerging technologies to enhance operational efficiency, support digital transformation, and deliver long-term value in dynamic, fast-paced organizations.

BUSINESS SKILLS

Business Analysis | Solution Design | Project Coordination | Strategic Planning | Process Improvement | Agile Development | Requirements Gathering | Cross-Functional Collaboration | Technical Communication | Change Management | Continuous Improvement

TECHNICAL SKILLS

Programming Languages:	HTML5 CSS3 PHP Alpine.JS Java SQL Python JavaScript Laravel
Data Management and Analysis:	Probability & Statistics DBMS (Database Management Systems) Firebase Microsoft Access MySQL
Project Management:	WordPress Microsoft Project Management Git and GitHub Technical writer
Operating system:	Windows 7,8,10,11 Windows, Linux, MacOS installation, configuration and troubleshooting
Hardware and devices:	PC assembly and hardware installation Troubleshooting RAM HDD SSD PSU Motherboard issues
Networking:	TCP/IP LAN – WLAN setup Router and switch configuration IP address addressing, DNS, DHCP Basics Network
Software and applications:	Microsoft Office (installation and support) business software installation and configuration antivirus and endpoint protection tools.
IT support and troubleshooting:	Hardware and software diagnostics System maintenance and performance optimisation OS upgrades and system recovery Backup and data restoration
Security basics:	User account management Microsoft 365 Password policies and access permissions Malware removal and basic cybersecurity

CAREER EXPERIENCE

Software Engineer / Web Developer Pertubuhan Peduli Insan

October 2022 – March 2024
Shah Alam, Malaysia

- Engineered and maintained scalable full-stack web applications using **Laravel**, delivering secure, high-performance solutions that aligned with evolving business objectives.
- Designed and developed responsive, reusable, and mobile-first user interface components, enhancing application usability, accessibility, and overall user experience.
- Built and integrated RESTful APIs to enable seamless communication between front-end interfaces and back-end services, supporting efficient data exchange and system interoperability.
- Optimized application architecture by implementing clean coding standards, MVC design principles, and performance-focused development practices to improve maintainability and scalability.
- Partnered with business stakeholders and cross-functional teams to translate operational requirements into practical, user-centric technology solutions.
- Investigated and resolved application defects, production incidents, and performance bottlenecks, ensuring system stability and minimizing service disruptions.
- Leveraged AI-assisted development tools to accelerate debugging, evaluate implementation approaches, and improve development efficiency while maintaining code quality.
- Collaborated closely with developers to implement new features, refine user interfaces, and deliver consistent functionality across multiple application modules.

- Delivered responsive IT support to 50+ internal users, resolving the majority of technical issues on first contact while maintaining high levels of end-user satisfaction.
- Diagnosed and resolved hardware, software, network, and system-related issues, helping reduce downtime and ensure reliable day-to-day business operations.
- Installed, configured, and maintained desktops, laptops, printers, and peripheral devices, ensuring employees had dependable access to essential technology resources.
- Managed Windows and Linux operating system installations, software deployments, and user account configurations, improving the efficiency of device provisioning and onboarding.
- Partnered with employees across departments to communicate technical solutions in a clear, user-friendly manner, reducing repeat support requests and improving technology adoption.
- Contributed to IT process improvements by aligning technology solutions with operational needs, supporting increased efficiency across the organization.
- Performed routine system maintenance, updates, and preventive troubleshooting to enhance infrastructure stability and minimize service disruptions.

IT Assistant (Work-Study) – Computer Science Department

City University Malaysia

Feb 2021 – Jul 2022

- Provided frontline technical support for faculty, staff, and students by resolving hardware, software, network, and printer issues and ensuring reliable day-to-day IT operations.
- Built, configured, and deployed desktop computers and workstations to support academic instruction, research activities, and departmental computing requirements.
- Managed technical support requests through the department's IT ticketing system, prioritizing incidents, tracking resolutions, and maintaining accurate service records.
- Diagnosed and resolved system and connectivity issues using a structured troubleshooting approach, minimizing disruptions to teaching and administrative functions.
- Collaborated with departmental leadership and external vendors to evaluate technology requirements, recommend suitable hardware solutions, and support IT procurement activities.
- Installed, configured, and maintained operating systems, software applications, drivers, and peripheral devices to ensure optimal workstation performance.
- Developed and maintained technical documentation, user guides, and standard operating procedures (SOPs), improving knowledge sharing and support consistency.

EDUCATION

MSc Information Technology Management , University for the Creative Arts	10/2023 – 04/2026
Program delivered at Berlin School of Business and Innovation in Berlin	Berlin, Germany
Bachelor of Computer Science (Hons) in Software Engineering	01/2020 – 03/2023
City University of Science and Technology	Selangor, Malaysia

LANGUAGES

English (Fluent) | German (B1 (currently studying)) | Arabic (Native)
